CITROËN C8: THE NEXT GENERATION OF EXECUTIVE MPV

A NEW DRIVING EXPERIENCE

So, you're sitting comfortably. In front of you is a dashboard like you have never seen before. And with all the functionality at your fingertips, you have the best environment in which to be relaxed, to be alert and, most of all, to be in complete control. Add to this the Citroën C8's electronic systems that use innovative multiplexing technology, and no other executive MPV in the market can match the C8's complete package of advanced features. Luxury-car features that add up to the highest standards of comfort and safety, but most of all to an unparalleled driving experience.

Cruise control allows the driver to set a speed for the car on the open road, which will then be maintained by the vehicle without use of the pedals. The system also now comes equipped with an innovative Speed Limiter, this allows the driver to set a maximum speed for the car which can then not be exceeded without deliberate intervention from the driver. Standard on VSX Auto and optional on all other models.

Electrically adjustable door mirrors feature across the range for added convenience, while on VSX models, the mirrors automatically retract when locking the vehicle.

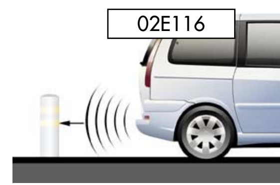

As well as the locking and unlocking functions, the high-frequency 'plip' remote control has a clever extra function that allows you to locate your vehicle in busy car parks. Rather impressively, on VSX models, the system can also operate the side sliding rear doors.

Electrically adjustable heated leather seats offer a memory function, allowing drivers to programme their ideal seating position, while the 3 heating levels ensure the perfect driving environment. Electrically adjustable heated leather upholstery can be specified on VSX models.

Centrally mounted operating controls for the Electric Sliding Rear Doors are conveniently located above the rear view mirror and beside the centrally mounted door locking control, within easy reach for the driver and front seat passenger.

Engage reverse gear and the rear parking sensors are automatically activated using ultrasound to signal the proximity of an obstacle. Invaluable for modern-day city driving! Rear parking assistance can be specified on VSX models.

NEW STANDARDS FOR LIFE ON-BOARD

The New Citroën C8 has been designed with driving enjoyment and simplicity in mind. Advanced multiplex technology, which allows various electronic functions to be linked within the cabin, excellent ergonomics, various steering mounted controls and large, easily legible instrument displays all combine to make the driving experience much more intuitive and pleasurable.

With 8-speakers fitted throughout the cabin, the Citroën C8 ensures perfect sound reproduction from the music system. The volume is also speed sensitive allowing everyone within the car to enjoy the sound at all times.

Totally integrated into the dashboard of the vehicle, the NaviDrive system combines all the functions of a Radio CD, Satellite navigation, and Hands free integrated telephone. Optional on VSX models.

In order to ensure that all of this information, such as a navigation itinerary, is easily legible, the optional NaviDrive system also includes a large 7" colour screen situated centrally on the upper dashboard.

All the functions of the optional NaviDrive system are controlled via a single, easy to use command unit, conveniently located on the centre console.

COMFORT IN ALL ITS FORMS

The Citroen C8 is fitted with Air Conditioning to ensure the perfect temperature at all times. On VSX models tri-zone Climate Control air conditioning is on offer so that different temperatures can be chosen for driver and front passengers with additonal rear compartment air vents with adjustable airflow. The controls for the system are centrally located on the dashboard for ease of use by both the driver and front seat passenger.

In automatic mode, the system constantly regulates and maintains the chosen temperature by monitoring exterior light levels and cabin conditions, this ensures that the ideal temperature is maintained at all times without any need for adjustment.

AN EVENING OUT A WEEKEND BREAK

COMFORT AND FLEXIBILITY

The Citroën C8 can adapt with ease to cater for the changing demands of your lifestyle. The three rows of seating feature seven individual full-size seats. All individual rear seats are rake and reach adjustable and, thanks to a broad high backrest that is slightly curved at the base, they also provide excellent lumbar support. A third-row three-seat passenger bench can also be specified should additional accommodation be required.

THE FREEDOM OF SPACE

There's plenty of space to move around inside the C8. You can put it down to the huge variety of seat configurations (you can join them together, reverse them around or take them out completely!). And to the generous dimensions of the cabin. And to the completely flat expanse of floor. And to the positioning of the gear lever on the dashboard rather than being floor mounted. And to the swivelling front seats on VSX models and above. And to the optional third row passenger bench, It all adds up to an abundance of freedom.

With more than fifty compartments, the C8 abounds with all the storage you could ever need. And although the interior is amply spacious, we've still used some rather clever design devices to provide a positive plethora of compartments to enhance your travelling experience. You could almost take the kitchen sink with you!

For example, there's the up-front shuttered compartments, the 7.5 litre area for CDs, the spaces for the likes of glasses, keys, mobile phone, pens and the capacious door panel pockets. And all that's just in the front seating area! Such attention to detail really does set the Citroën C8 apart from the rest of the pack and is symptomatic of the supreme attention to detail you can expect.

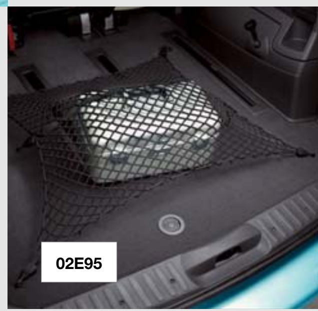

As you might expect, the Citroën C8's boot has been designed with optimum capacity and practicality firmly in mind. As well as a parcel shelf, the boot is fitted with useful floor and pillar-mounted lashing eyes. Then there's the boot net that you can position horizontally, to secure your cargo to the floor, or as a hammock. And because the seating is so flexible, you can increase the luggage storage area from the standard 225 litres (with the rear seats in situ) up to a whopping 2,948 litres.

The all-encompassing boot net means that those packages don't end up all over the place.

The generous boot features a parcel shelf that also acts to shield your luggage from view.

Check it out. The Citroën C8 provides a host of storage compartments. Your only problem may be remembering where you put what!

As well as the front passenger glovebox, there are two extra glove boxes conveniently housed in the upper part of the dashboard with anti-noise and anti-slip linings.

The front and rear door panels each contain a spacious compartment which can, for instance, hold a can, a 1.5 litre bottle or A4 documents.

The back of the front seats on VSX models house aircraft-style tables with integrated cup-holders. Need to do a little work on the laptop or know someone who needs to get down to some serious crayoning? Just fold the rear seats down and you have a compact but practical desktop.

The lower central console is home to a multi-use pivoting drawer. There are two cup-holders, a removable ashtray and a cigar lighter that doubles as a 12v power socket. At the bottom of the drawer is an air-conditioned section for keeping those cans deliciously cool.

On VSX models the area beneath the front passenger seat provides yet another useful storage area.

The front passenger glovebox is smart and functional.

THE HEART THAT POWERS C8

DIESEL DISCRETION

Combining performance with a responsibility towards the environment, the Citroën C8 engines can rival the best in their class.

Advanced HDi high-pressure common rail diesel technology is recognised as one of the leaders in the sector and offers the perfect combination between power, economy, flexibility and quietness. The 2.0HDi engine in the Citroën C8 produces 110bhp as well as an extremely impressive 270Nm of torque from just 2,500rpm.

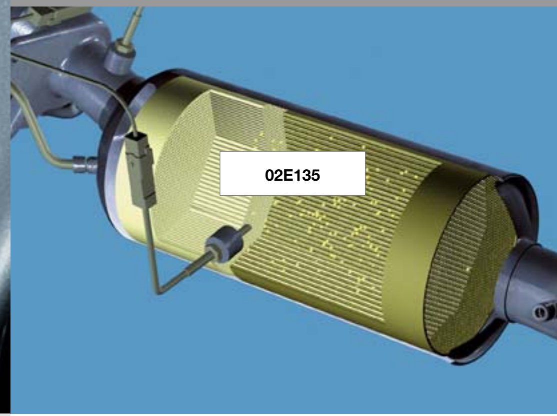

GEARBOXES

The Citroën C8 is equipped with the choice of 5-speed manual and 4-speed automatic gearboxes. The dash mounted gearlever is ideally positioned for precise changes, offering responsive acceleration and power at your fingertips. The automatic gearbox offers a sequential gear change function and is available on VSX models.

PARTICULATE FILTER

The HDi engine technology on offer in the Citroën C8 is designed to minimise any impact on the environment through lower emissions and superb fuel economy. Certain C8 HDi models can also be fitted with the ground-breaking Particulate Filter System. The filter traps many of the harmful particles responsible for the generation of black smoke and periodically eliminates them by burning them at very high temperatures.

AN EYE FOR DETAIL ... A HEA LTHY OBSESSION WITH SAFETY

02E8

02E9

YOU'RE IN CONTROL

You're in the driving seat and you're in control. In fact, it's never been easier to be in complete control with the New Citroën C8.

Electronic Stability Programme (ESP)

ESP shows its full worth when cornering. The on-board Electronic Control Unit, ECU, monitors the progress of the vehicle through a bend and ensures complete stability and control by instantly adjusting the engine revs and braking system, if required. It can prove to be invaluable for those momentary lapses of concentration or when driving an unfamiliar route. ESP comes as standard across the range.

Traction control

This comes into play when pulling away on poor road surfaces when getting a grip can prove to be a problem. If any of the wheel sensors detect the first signs of a skid, the brake is automatically applied at just the right level to alleviate the problem and supply optimum vehicle response. Traction control is linked to the ESP system.

Emergency Braking Assistance (EBA)

EBA comes as standard across the range. Research shows that in an emergency situation many drivers don't use the brakes to their full capacity. EBA cleverly compensates for this by first detecting whether the brakes have been suddenly and sharply applied. It then automatically operates the brakes to their full force and at the same time activates the rear hazard warning lights. And all in the blink of an eye.

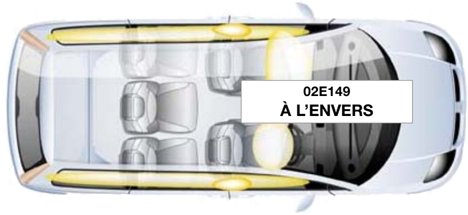

ABS with Electronic Braking Distribution

The Antilock Braking System (ABS) constantly monitors and adjusts braking pressure to avoid locking the wheels. Working in tandem with the ABS, EBD automatically adjusts braking power to each of the wheels to avoid skidding or spinning on the road. ABS with EBD is standard across the range.

SAFE AND SECURE

When it comes to airbags, C8 is streets ahead of the competition. As a standard across the range, there's an impressive total of six. The driver's and front passenger's have two levels of activation according to the force of the impact and the front passenger's can also be independently de-activated if a rear-facing child seat is in situ. Front seat chest protection is ensured by two front lateral airbags and the C8 also features as standard two full length side window curtain airbags, running the full length of the cabin they protect the heads of outer passengers in all three rows.

Once under way and travelling at over 10 km/h, the New C8 automatically locks the boot and all the doors so occupants and also baggage are completely secure. And there's an additional button in the front overhead console that controls the central locking function.

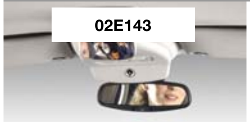

Needless to say, this automated central locking function is completely adaptable and can be de-activated at any time by the driver or adult front passenger via the central console. A message on the multi-function central display indicates the prevailing central locking status.

VISIBILITY FOR INCREASED SAFETY

All versions are equipped with a useful additional rearview mirror, perfect for keeping an eye on rear seat passengers while still remaining focussed on the road.

The Citroën C8 offers automatic headlamps on VSX models, switching on automatically in poor light or in heavy rain for perfect visibility at all times. Another useful feature are the "guide me home" headlamps which can be selected to remain on for 30 seconds after you leave the car to guide your way in poorly lit locations. Advanced Xenon lights are also an option on VSX Auto models.

Visibility, both to see and also be seen, is of great importance to driving safety. The lighting of the Citroën C8 has been designed to offer exceptional visibility in all conditions. The complex surface headlamps also incorporate integrated front fog lights, this all combines to ensure that the C8 offers strong, even lighting at all times. The automatic headlamps on VSX models are combined with rain sensitive front wipers and constantly monitor light levels automatically.

The large glass area of the cabin offers the driver a clear view of the road around them. Large electrically adjustable mirrors are offered on all models. An electrochrome rearview mirror on VSX models serves to eliminate glare for better visibility at night. Automatic hazard warning lights and a third high level brake light also feature across the range.

In the event of sudden and strong deceleration the hazard lights are automatically activated, giving the drivers behind a timely warning. They are de-activated automatically as soon as the vehicle speeds up again.

MAKE YOU CHOICE!

C8 RANGE

CITROËN C8
2.0HDi 110bhp

CITROËN C8 VSX
2.0HDi 110bhp

CITROËN CARE FOR CAR AND DRIVER

Dealer Network
Across Ireland, a network of Main Citroën Dealers are equipped and trained to meet the needs of today's motorists, each with a team of technicians skilled in the care and maintenance of Citroën cars and vans, and using only genuine Citroën parts.

Comprehensive Warranty
Every new Citroën car has the benefit of a 2 year manufacturers warranty plus a 12 year anti-corrosion warranty and 3 year paint warranty.

Citroën Protector
This is an optional extended warranty cover for a further 12, 24 or 36 months after the original 24 months warranty expires. Citroën Protector is available for a reasonable cost on all vehicles sold by Approved Citroën Dealers, except vehicles used for hire or reward, taxis, motor sport and the emergency services. This is a comprehensive bumper-to-bumper breakdown insurance cover and includes Citroën Assist 24 hour breakdown recovery service.

Citroën Assist
Whilst Citroën cars are engineered for maximum reliability, there is always the possibility of something going wrong due to circumstances beyond your control. In response to a free telephone call, Citroën Assist designed by Gallic Distributors Ltd., brings rapid expert roadside assistance to you in an emergency. It comes free of charge for two years and operates 24 hours a day in all parts of Ireland. Citroën Assist also offers a comprehensive European service. Full details are available from your Citroën Dealer.

Citroën Accessories
No matter which model of vehicle you have chosen, Citroën offers you a wide selection of accessories that have been specially designed to complement the style of your vehicle. The accessories available will allow you to add the personal touch to your vehicle. Genuine Citroën accessories are custom made for your vehicle and are available through your nearest Citroën Dealer.

Internet
The Citroën website contains full information on all Citroën products and offers available in the Republic of Ireland. The site address is www.citroen.ie

This brochure is intended to show the general apperance of the New Citroën C8. Some of the photographs depict UK or left hand drive vehicles whose specification may not necessarily corform to vehicles imported into the Republic of Ireland. The company however reserves the right, whilst preserving the essential characteristics of the model described, to introduce at any time modifications, changes of detail, equipment or accessories as may be considered necessary to improve the model described or for any other reason. The reproduction of body colours in this brochure may vary slightly from the actual colours due to printing techniques that may not guarantee a faithful copy. Every effort will be made to bring the brochure up to date from time to time, but to avoid any misunderstandings any person interested should enquire of the company or its agents as to whether there have been material alterations since the issue of this brochure (September 2005)
